

AYUSH SAHNI

AI Builder · Production AI Tools & Automations · Cloud & DevOps

Reno, NV | +1 (341) 221-9731 | ayushsahni.work@gmail.com | linkedin.com/in/ayush-sahni | github.com/Ayushsahnios

SUMMARY

AI Builder shaping enterprise AI strategy for a \$6B logistics company, building AI-powered automations and prototype-to-production pipelines. Background in cloud infrastructure, DevOps, IoT operations, and technical project management, with results like 40% faster IoT setup across 100+ properties and 35% fewer API errors in bank verification services.

SKILLS

AI & LLMs	LLM/agent development, Claude, OpenAI API, LangChain, prompt engineering, AI automation
Languages & Frameworks	Python, SQL, JavaScript, PostgreSQL, FastAPI, Flask, REST APIs, Angular, Selenium
Cloud & DevOps	AWS (EC2, S3, CloudFormation, CloudWatch), Azure, Kubernetes, Helm, Docker
Automation & Ops	Microsoft Power Automate, Jira workflows, Slack automations, ELK Stack, IoT device provisioning

EXPERIENCE

ITS Logistics — *AI Builder* Reno, NV · May 2026 – Present

- Shaping the enterprise AI strategy for a \$6B logistics company, defining AI-first software and product development processes.
- Developing automated pipelines that transition AI prototypes into production engineering workflows.
- Creating AI-powered logistics automations, including custom track-and-trace workflows for internal teams and customers.
- Partnering with operations teams to identify pain points and ensure tools align with business needs.

HotelKey — *IoT Operations & Automation Analyst* Carrollton, TX · Aug 2025 – Apr 2026

- Optimized IoT deployment workflows by designing standardized procedures and Python automation, reducing property setup time by 40%.
- Managed 3 offshore engineers for IoT device configuration, cutting resolution time by 30%; connected engineering, logistics, and property teams through Jira and Slack automations for real-time shipment tracking.
- Oversaw the end-to-end supply chain for IoT devices across 100+ properties, managing \$500K/month in hardware procurement.

Aspen EPC LLC — *Technical Project Manager (AI Automation)* Houston, TX · Jan 2025 – Jul 2025

- Led initiatives integrating AI automation into legacy systems; managed the architecture of an AWS-hosted resource planning platform, optimizing cloud resource allocation.
- Ran sprint cycles and stakeholder demos in Jira, aligning OKRs with product milestones across three verticals.
- Oversaw procurement for industrial plants, including logistics for a \$300K concrete dry batching plant.

Mithi Software Technologies — *Cloud Infrastructure Engineer* Pune, India · Sep 2021 – Jun 2022

- Directed phased releases of cloud-based FastAPI microservices with PostgreSQL materialized views, supporting 5K+ daily API calls.
- Orchestrated infrastructure-as-code rollouts with AWS CloudFormation, Kubernetes, and Helm; built CloudWatch dashboards and S3 ingestion-log monitoring to alert on pipeline anomalies.

Accenture — *Associate Software Engineer* Gurugram, India · May 2021 – Sep 2021

- Executed 3,000+ SQL performance and unit tests and automated ERP functional testing with Selenium, improving testing efficiency by 30% and cutting manual effort by 25%.

Signzy — *Business Analyst* Bengaluru, India · Feb 2020 – May 2021

- Led the integration of verification APIs into banking workflows for HDFC Bank and Emirates NBD Bank.
- Developed and monitored APIs that reduced error rates by 35%, using the ELK Stack and CloudWatch for real-time monitoring that cut verification latency.

New10s Online Shopping Pvt. Ltd. — *Technical Lead* Coimbatore, India · Aug 2017 – Jan 2020

- Designed the full-stack architecture of a custom merchandise platform (Flask, PostgreSQL, AWS EC2 with S3 backups), including dashboards, login, and payments; coordinated product teams and freelance developers.

PROJECTS

Zero Cloud Home Lab — *k3s, Docker, Cloudflare Tunnel* github.com/Ayushsahnios/zero-cloud-home-lab

- 3-node k3s cluster on three Chromebooks self-hosting Grafana, Prometheus, Gitea, Drone CI, and Pi-hole via Cloudflare Tunnel, with zero open ports and zero cloud cost.

EDUCATION & CERTIFICATIONS

California State University, East Bay — *Master of Science, Computer Science* Aug 2022 – Dec 2024

Karunya Institute of Technology and Sciences — *Bachelor of Technology, Computer Science* Jul 2016 – May 2020

AWS Certified Cloud Practitioner (Amazon Web Services) · IBM Bluemix Essentials (IBM)
